Free Speech in Wales

KATON BOUZALAKOS

INDEPENDENT CANDIDATE

POWER BACK TO THE PEOPLE OF SWANSEA & GOWER

Key Priorities:

- Introduce the Swiss-style referendum system.
- Reduce spending to delete the current Swansea government debts of (as at 31 March 2025) £ 636 million.
- Prioritise local businesses & residents in council contracts.
- Ban carcinogenic glyphosate pesticides on council land (save £110k+ and protect health). Many UK councils have already banned them — I will push Swansea to do the same and adopt safer, pesticide-free methods.
- Support local farmers & fishermen – reduce imports and pesticide risks
- Free/subsidised household water filters for cleaner drinking water
- Reopen coal mines, we buy our energy all around the world, the transport only creates a huge carbon footprint and dependency.
- Energy independent for Swansea (rooftop solar & more) to cut bills.
- Switch to secure open source software - save millions in licensing costs.
- Ensure same-day vote counting and vigorous checkers to restore trust in elections.
- Police/DBS checks on all council contractors and shareholders. Some current Swansea contractors are going against international law.
- No congestion charges in Swansea.
- Protect Gower's unique character and Welsh communities.

Practical, common-sense solutions - not distant global agendas.
Vote for real accountability and transparency
